EVOLUTION EL-D

The EVOLUTION upper rubber with the best tuning in terms of grip, coupling, optimized ball contact time, energy absorption and release, has been combined with an elastic medium-hard RED ENERGY SPONGE. This newly developed sponge offers higher dynamics with a softer feel and shows its enormous power especially in topspin. The result is the new EVOLUTION version EL-D, which plays noticeably different than the also excellent EL-P and EL-S versions and is even on par with the top models MX-P and MX-S in terms of performance, spin and speed. This dynamic in the elastic medium-hard range is unequalled and has the ambition to set new standards.

Speed:	124
Control:	83
Spin:	120
Sponge:	1.9-2.0 2.1-2.2 mm
Rubber hardness:	45 - 47 *
Strategy:	OFF- to OFF+
Colours:	Red, black

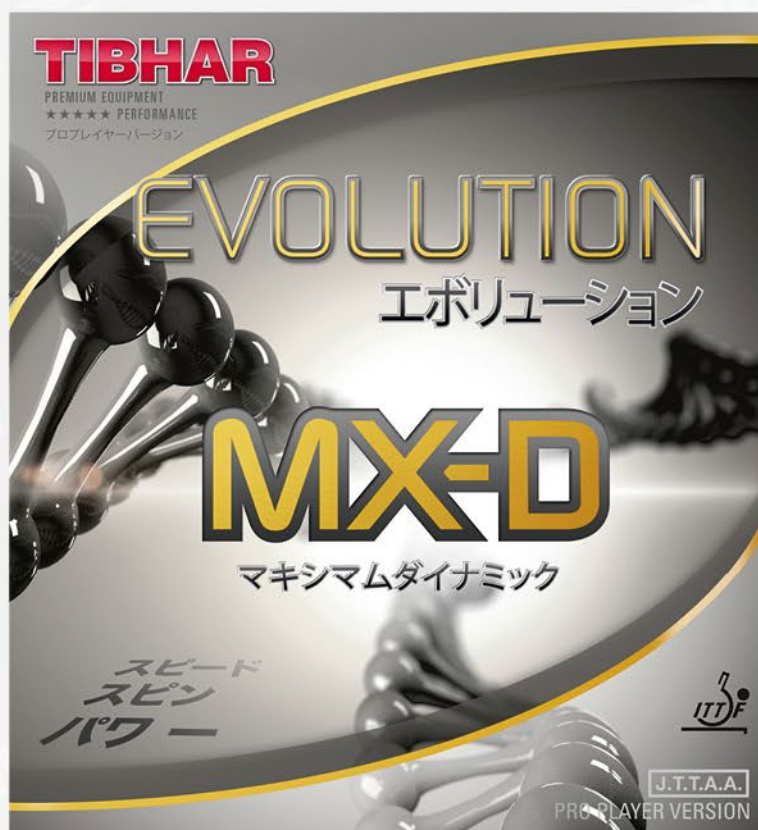

EVOLUTION FX-D

The EVOLUTION rubber surface with the best tuning in terms of grip, coupling, optimized ball contact time, energy absorption and release, has been combined with a flexible medium-hard RED ENERGY SPONGE. This newly developed sponge offers higher dynamics with a softer sensation and shows its enormous power especially in topspin. The result is the new EVOLUTION FX-D, which plays noticeably different than the also excellent FX-P and FX-S versions and is even ranging between the top performing EL-P and EL-S and the top models MX-P and MX-S in terms of performance, spin and speed. This dynamic in the flexible medium-hard range is unequalled and has the ambition to set new standards.

Speed:	120
Control:	87
Spin:	118
Sponge:	1.9-2.0 2.1-2.2 mm
Rubber hardness:	43 - 45 *
Strategy:	ALL+ to OFF
Colours:	Red, black

EVOLUTION MX-D

Very adhering PRO rubber surface, hard power sponge – maximum dynamic and extraordinary high spin. What are your looking for? The maximum power of MX-P and at the same time the maximum spin of MX-S? You cannot make up your mind and you are looking for a rubber combining the characteristics of these legendary rubbers: our high-performance rubber EVOLUTION MX-D offers a new version at the top of the world's most powerful table tennis rubbers with maximum dynamic. The EVOLUTION top rubber with the best tuning in terms of grip, coupling, optimized ball contact time, energy absorption and release have been combined with the brand new RED ENERGY SPONGE. This newly developed sponge offers higher dynamics with a softer feel and deploys its enormous performances especially in topspin.

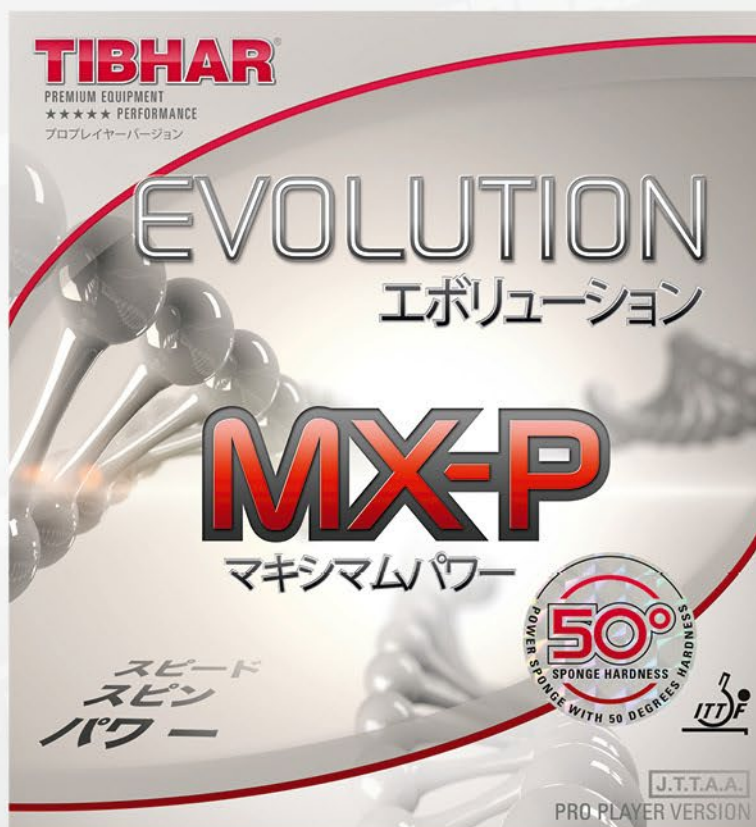

Speed:	130
Control:	75
Spin:	122
Sponge:	1.9–2.0 2.1–2.2 mm
Rubber hardness:	50.3 – 52.3 *
Strategy:	OFF to OFF+
Colours:	Red, black

EVOLUTION MX-P 50

The MX-P 50 hard version's rubber surface is identical to the rubber surface of the famous MX-P (47.5°). This high performance surface was available with fine- and open-pored (47.5°) sponges for our professional players on request. The harder sponge of MX-P 50° perfectly adapts to the generation of plastic balls, renowned for taking the pressure off your strokes and is also available for ambitious attacking players. It plays noticeably differently with an increased forward and direct motion.

Speed:	128
Control:	75
Spin:	120
Sponge:	2.1–2.2 mm
Rubber hardness:	48.8 – 50.8 *
Strategy:	OFF to OFF+
Colours:	Red, black

EVOLUTION MX-S

EVOLUTION MX-S is the spin-oriented dynamic version with significantly extended ball/bat contact time due to special pimple geometry. It is ideal for all players who activate the enormous performance potential of MX-S with a little more physical effort (acceleration arm / arm wrist).

At the table as well as from half-distance, MX-S performs equally at the highest level. In the thickness 1.5-1.6 mm, it is a modern classic for allround players.

Speed:	125
Control:	80
Spin:	124
Sponge:	1,7-1,8 1,9-2,0 2,1-2,2 mm
Rubber hardness:	46,3 - 48,3 *
Strategy:	ALL+ to OFF
Colours:	Red, black

EVOLUTION MX-P

Right after its introduction the rubber MX-P was among the classical attacking rubbers. Thanks to the perfect adjustment of the pimple geometry we managed to produce a rubber that confers more energy with all attacking balls, hence it is perfectly adapted to any player's game.

You can feel the prolonged ball/bat contact time of the MX-P, which for a rubber with hard sponge confers more sensation. EVOLUTION MX-P chosen by most topspin players willing to feel the necessary pressure of their strokes at the table and at half distance.

Speed:	125
Control:	80
Spin:	122
Sponge:	1,7-1,8 1,9-2,0 2,1-2,2 mm
Rubber hardness:	45,7 - 47,7 *
Strategy:	OFF- to OFF+
Colours:	Red, black

EVOLUTION EL-P

EVOLUTION EL-P is the most elastic rubber of the EVOLUTION rubber series. EL-P with its medium sponge perfectly fits in between the harder MX-P or MX-S and the softer FX-P and thus completes the EVOLUTION series. The selected pimple geometry of the elastic EL-P does not even come close to the other EVOLUTION versions in terms of spin and speed. Very precise and powerful strokes can be realized at half distance or at the table.

EVOLUTION EL-P: chosen by most of the Topspin players for whom the MX version is too hard and the FX version too soft, but are putting the emphasis on rotation and power.

Due to a somewhat straighter bounce, it is also extremely popular with block players, especially in the 1.5-1.6 mm thickness.

Speed:	121
Control:	83
Spin:	117
Sponge:	1,7-1,8 1,9-2,0 2,1-2,2 mm
Rubber hardness:	42,4 - 44,4 *
Strategy:	ALL+ to OFF+
Colours:	Red, black

EVOLUTION EL-S

High grip PRO top rubber, elastic medium hard sponge, exceptionally high speed and maximum spin. With the EVOLUTION EL-S, the enormous spin values of the MX-S and the power of the MX-P have been combined with the high-performance surface. In combination with a medium-hard sponge and a specially tuned pimple geometry, another independent rubber in the EVOLUTION range has been created that sets standards in terms of elasticity. The outstanding racket-ball contact ensures a sensitive touch despite enormous dynamics and highest spin values. Outstanding on topspin or undercut, the EL-S goes one better on follow-through and offers maximum rotation and power in all playing situations.

Speed:	123
Control:	85
Spin:	120
Sponge:	1,7-1,8 1,9-2,0 2,1-2,2 mm
Rubber hardness:	43,8 - 45,8 *
Strategy:	OFF- to OFF+
Colours:	Red, black

EVOLUTION FX-P

FX-P is the most flexible and soft version of the EVOLUTION rubber family. This rubber confers a lot of sensation and control in any playing situation. FX-P is a high-performing rubber proven by the enormous sound resulting from topspin strokes. The rubber surface is rich in spins and its SOFT sponge with high catapult effect gives the sufficient power necessary for a variable topspin game. The player who likes to attack near the table and is not willing to concede any ball while playing a risky game will be delighted by the fine tuning of the rubber surface with the SOFT sponge of the EVOLUTION FX-P.

Speed:	120
Control:	90
Spin:	115
Sponge:	1,7-1,8 1,9-2,0 2,1-2,2 mm
Rubber hardness:	39,1 - 41,1 *
Strategy:	ALL to OFF
Colours:	Red, black

EVOLUTION FX-S

FX-S is the little brother of the EL-S. FX-S combines the enormous spin values of the MX-S with the power of the MX-P. The sponge of the FX-S is softer than the sponge of the EL-S, so that the FX-S combined with a personalized pimple geometry is more elastic and generates 'flexible spin'.

The FX-S is much softer than the MX-P and MX-S, but slightly harder than the FX-P. FX-S significantly distinguishes itself from the medium rubbers EL-P and EL-S.

Speed:	118
Control:	87
Spin:	117
Sponge:	1,7-1,8 1,9-2,0 2,1-2,2 mm
Rubber hardness:	41 - 43 *
Strategy:	ALL+ to OFF
Colours:	Red, black

HYBRID K3

HYBRID K3 combines characteristics that did not appear to be combinable until now: Despite its enormous tackiness, HYBRID K3 convinces by its high dynamic and powerful catapult effect. The hard sponge represents the basis of high speeds.

The pimple rubber gives you the sensation that you will be able to counter immediately and effortlessly your adversary's balls – whether undercut or spin loaded topspins. Because fast rubbers often represent a challenge when it comes to optimal control and good placement, with K3 you will definitely master it. Experience unlimited possibilities with HYBRID K3.

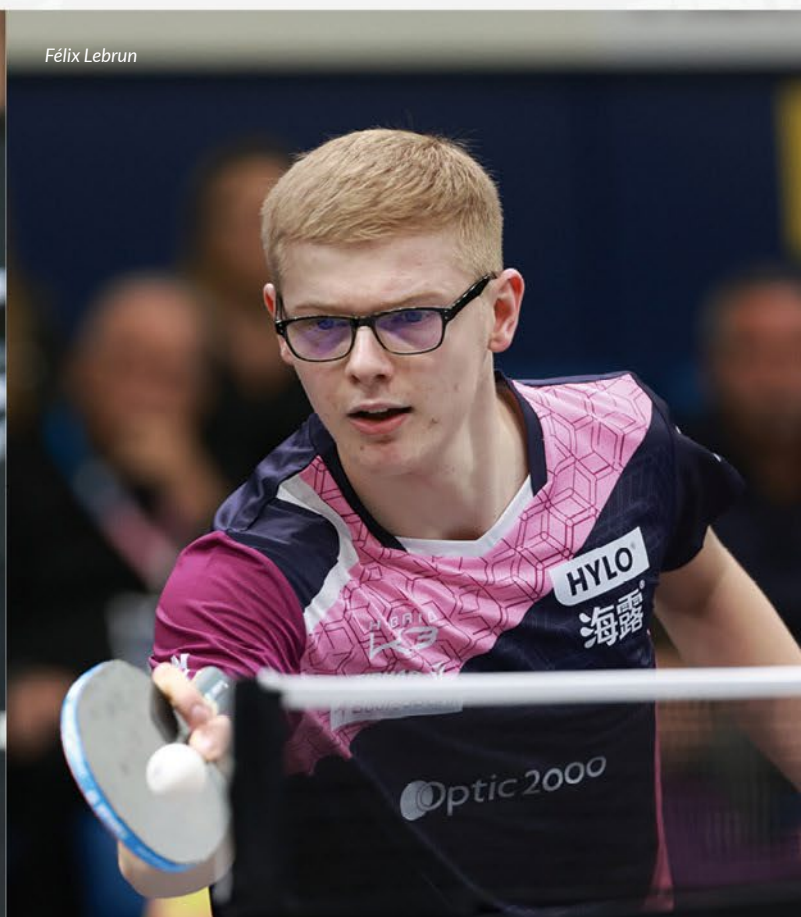

Speed:	118
Control:	100
Spin:	130
Sponge:	2,0 MAX mm
Sp. hardness:	53°
Strategy:	OFF+
Colours:	Red, black

Alexis Lebrun

Félix Lebrun

HYBRID K3 PRO

Hybrid K3 Pro is perfectly adapted to the game of the uncompromising offensive player. With its increased sponge hardness and the resulting enhanced power and energy, this rubber enables the player to act even more uncompromisingly. Hybrid K3 Pro shows its full potential, especially in the opening and when countering the opponent's attacking strokes: extremely high quality and precision.

This rubber is also convincing when playing from half distance. The high ball trajectory gives you the necessary confidence and control to play very powerful and decisive topspins despite the increased distance from the table. In serve/return actions, the adhering surface and higher ball adhesion to the rubber allow you to generate significantly more spin and to optimally prepare your attacking strokes. These qualities make Hybrid K3 Pro a rubber of its own and the first choice of many players under TIBHAR contract.

Speed:	125
Control:	95
Spin:	130
Sponge:	2,0 MAX mm
Sp. hardness:	55°
Strategy:	OFF+
Colours:	Red, black

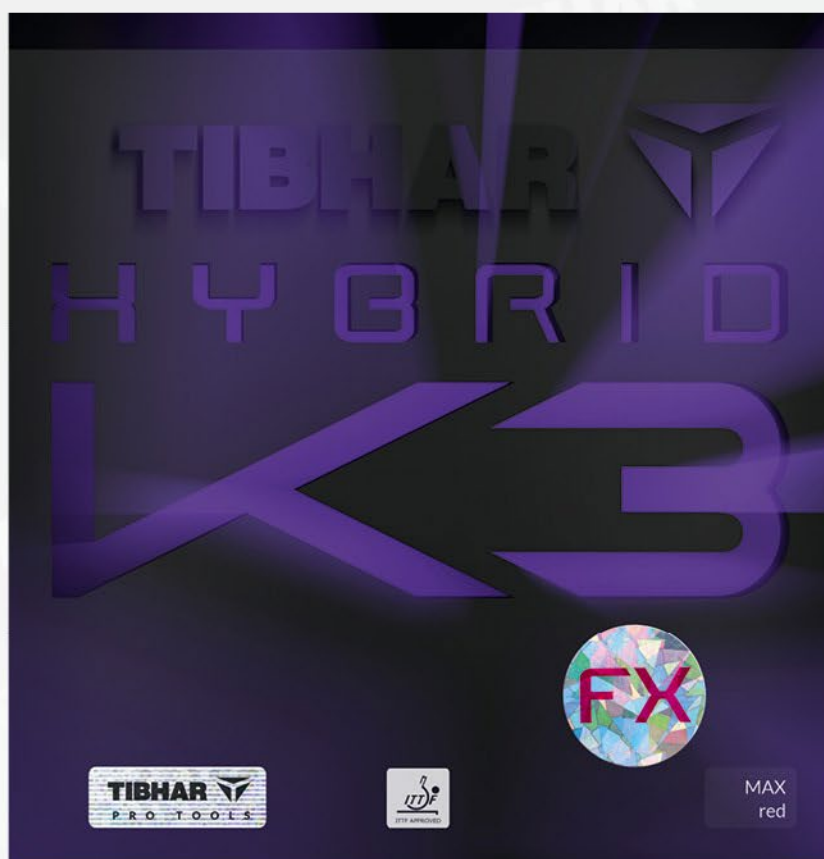

NEW

HYBRID K3 FX

The Hybrid K3 FX rubber corresponds to the soft version of the K3 rubber family. Its main characteristic is an optimal ball rebound, favored by the long ball/bat contact time and the phenomenal sound. It enables you to control all your strokes thanks to the security and control it confers.

Hybrid K3 FX deploys its full potential, mainly in the game opening and in the response to the adversary's counter strokes. Its adhering surface and the curved ball trajectory enable to generate much more spin and dynamics. Hybrid K3 FX perfectly suits a varied attacking game. You will be able to deploy in a precise and controlled manner the whole pallet of your strokes.

Speed:	115
Control:	105
Spin:	130
Sponge:	1,8 2,0 MAX mm
Sp. hardness:	48°
Strategy:	OFF
Colours:	Red, black

HYBRID K1 EUROPEAN VERSION

HYBRID K1 is a rubber „Made in Germany“ developed for the standards of Chinese TT art! The extremely catchy, almost sticky surface offers a great elasticity and thus, compared to classical Chinese rubbers, a multiple on acceleration and speed.

It is suitable therefore particularly well for the 40+ ball. The medium-hard, coarse-pored sponge with its excellent catapult reinforces the high acceleration potential, extends and strengthens the ball-flying curve. The exciting and innovative combination of catapult and extremely high rotation, due to the sticky rubber surface opens all Topspin players undreamed-of possibilities from the half distance and even close to the table.

Speed:	107
Control:	85
Spin:	115
Sponge:	1,8 2,0 MAX mm
Sp. hardness:	50°
Strategy:	OFF+
Colours:	Red, black

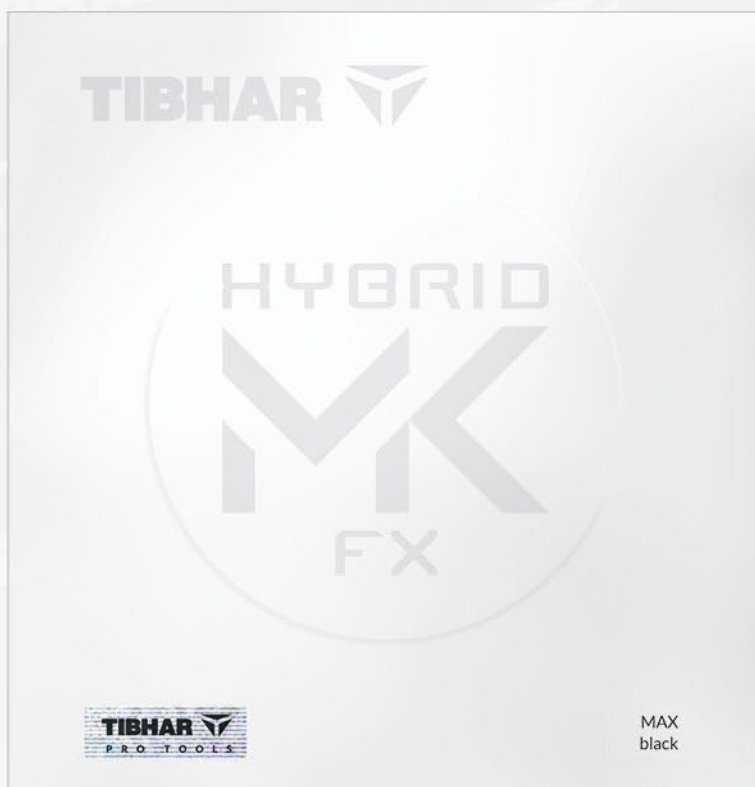

HYBRID MK FX

We have conceived Hybrid MK FX to allow players who privilege softer rubbers to enter the fascinating world of the Hybrid rubbers. Hybrid MK FX characterizes itself by its extraordinary playing sensation and great sound.

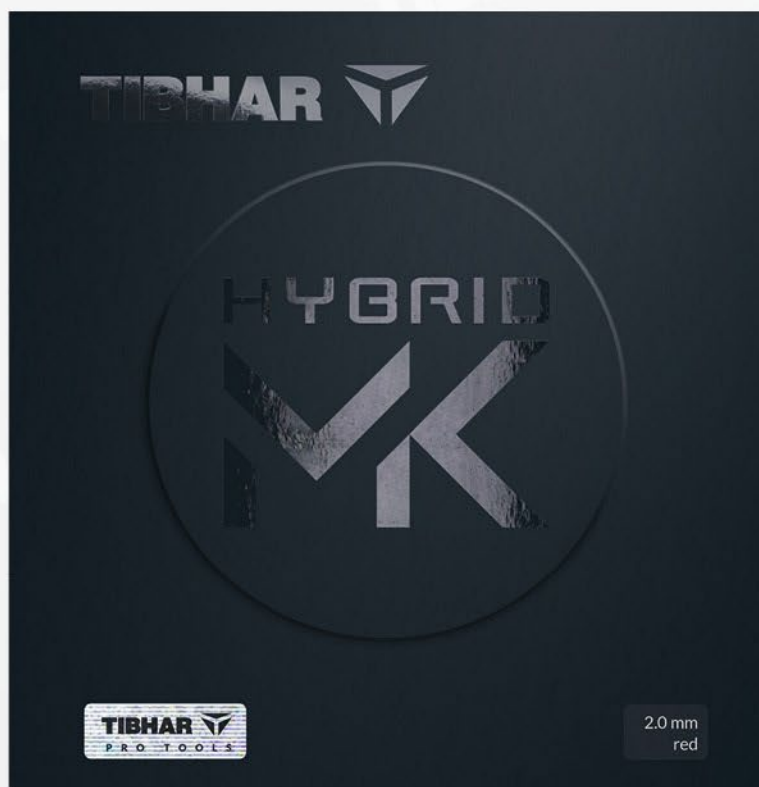

The sticky rubber surface, despite the softer sponge of the rubber, opens brand new possibilities to realize a wide spectrum of strokes. Players who privilege soft rubbers with high spin potential will be absolutely delighted about the Hybrid MK FX.

Speed:	118
Control:	104
Spin:	118
Sponge:	2,0 MAX mm
Sp. hardness:	44°
Strategy:	OFF-
Colours:	Red, black, pink

Kenta Matsudaira

HYBRID MK

The knowledge gained in the development of HYBRID K3 in collaboration with our top players Darko Jorgic, Vladimir Samsonov and Shang Kun form the basis for the HYBRID MK. That combination of knowledge, combined with the personal requirements of Kenta Matsudaira resulted in this offensive rubber.

HYBRID MK combines everything that defines Kenta's playing; extraordinary touch, high spin potential, long ball/bat contact time but still with enough reserves in speed to put pressure on your opponent.

Speed:	124
Control:	96
Spin:	120
Sponge:	2,0 MAX mm
Sp. hardness:	48°
Strategy:	OFF
Colours:	Red, black, blue

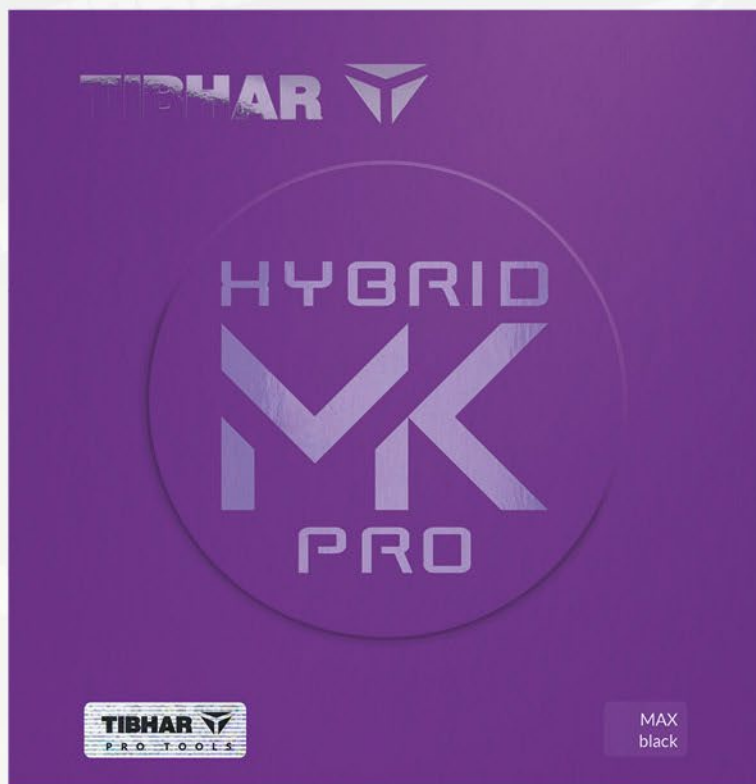

HYBRID MK PRO

A long ball/bat contact time for high spin potential, as you would need for attacking with high curves, very good ball feedback for perfect control and good speed reserves are the common DNA of the Hybrid MK rubber family.

For the experienced players who like to play with more power and for whom a rubber can never have enough speed, we have developed the Hybrid MK Pro. With its 51° hard sponge, it can convert more energy and is the perfect choice for aggressive attacking players.

Speed:	130
Control:	90
Spin:	124
Sponge:	2,0 MAX mm
Sp. hardness:	51°
Strategy:	OFF+
Colours:	Red, black

QUANTUM X PRO

QUANTUM X PRO – The reference – POP (PERFORMANCE ON POINT)

Improved speed and ratio "rotation/ball trajectory" -> the ball trajectory is better and easier to control. A harder sponge confers more power and energy to your strokes. The rubber surface is dynamic and adhering. These features are the main characteristics of Quantum X Pro.

POP (PERFORMANCE ON POINT) – This technology allows a better combination of power and rotation. The focus is not only to have a perfectly suited product combining the best playing characteristics, but, also and mainly to be able to achieve and unify extreme and maximum values in terms of rotation and speed. Many training hours are necessary to achieve this potential. This makes the task hard – not only for you but also for your opponents.

Speed:	115
Control:	95
Spin:	115
Sponge:	1,8 2,0 MAX mm
Sp. hardness:	47,5°
Strategy:	OFF
Colours:	Red, black

Speed:	115
Control:	95
Spin:	115
Sponge:	1,8 2,0 MAX mm
Sp. hardness:	47,5°
Strategy:	OFF
Colours:	Green, blue, violet, pink

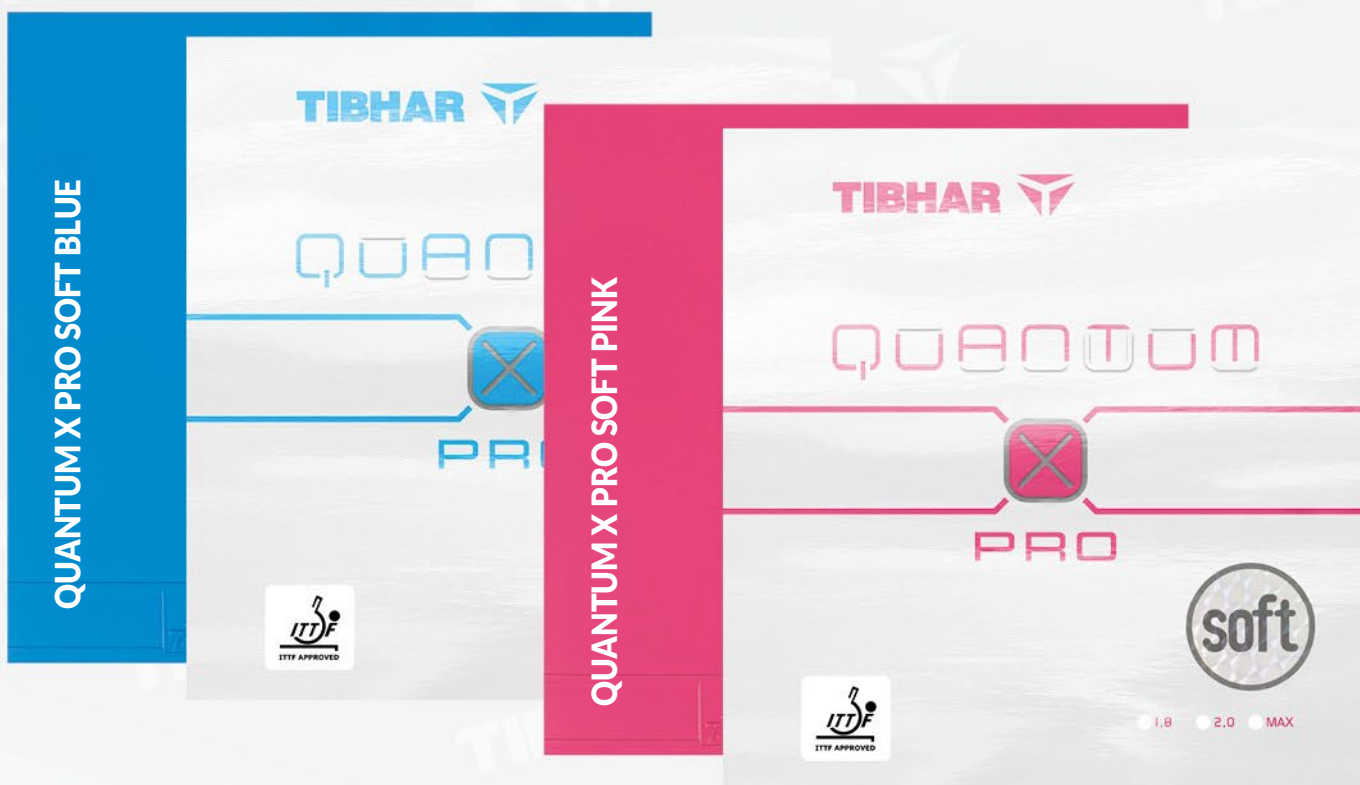

QUANTUM X PRO SOFT

A softer version of the QUANTUM X PRO, with the same high arc line, but with more control.

With a specially developed top sheet and 42.5° medium-hard sponge, the QUANTUM X PRO SOFT meets the needs of beginner and intermediate players who want to hit the ball with high power while maintaining control.

Speed:	110
Control:	100
Spin:	112
Sponge:	1,8 2,0 MAX mm
Sp. hardness:	42,5°
Strategy:	OFF-
Colours:	Red, black

Speed:	110
Control:	100
Spin:	112
Sponge:	1,8 2,0 MAX mm
Sp. hardness:	42,5°
Strategy:	OFF-
Colours:	Blue, pink

AURUS

The rubber for the ambitious player striving to play topspin strokes in any situation. The technology with the ultra SOFT rubber surface provides an outstanding spin and a great playing sensation, allowing a secured and aggressive game. The integrated SPI (Speedglue-Effect-Inside) technology confers an extreme catapult reaction to the ball.

Although you will use very little strength, your balls will be loaded with a lot of spin and speed. The exclusive transparent rubber surface confers stability and a long-life-expectancy. Notice the energy of this rubber after only few exchanges.

Speed:	109
Control:	90
Spin:	110
Sponge:	1,7 1,9 2,1 mm
Sp. hardness:	47,5°
Strategy:	OFF+
Colours:	Red, black

AURUS SOFT

The softer version of AURUS offers a better control with a high ball rebound. This energy-loaded rubber is ideal for spin-rich strokes and secured topspins, while enabling good control.

AURUS SOFT is very well adapted to each game level for an optimal performance.

Speed:	104
Control:	95
Spin:	112
Sponge:	1,7 1,9 2,1 mm
Sp. hardness:	42,5°
Strategy:	OFF
Colours:	Red, black

AURUS SOUND

The softest version of AURUS produces a great sound and pure playing pleasure. The balanced playing sensation of the SOFT sponge and the elastic rubber surface were adapted to players who do not want to give up energy-loaded strokes, although missing some training hours.

The SPI technology combined with the SOFT sponge confers an extraordinary sound. AURUS Sound combines sound, dynamic and the highest possible energy.

Speed:	100
Control:	105
Spin:	114
Sponge:	1,7 1,9 2,1 mm
Sp. hardness:	35°
Strategy:	OFF-
Colours:	Red, black

AURUS PRIME

An ideal choice for the offensive technical player who plays an attacking all-action game and requires perfect ball placement even when his opponent plays passive strokes. The smooth and spin oriented rubber surface combined with a middle hard, catapult loaded sponge will enable the user, in almost any playing situation, to put the sufficient amount of pressure on his opponent. With the innovative SSP technology (a thinner and smooth rubber surface combined with a thicker sponge), the result is a fast and catapult friendly offensive rubber; this rubber also combines an excellent price/quality ratio.

The Prime version of AURUS comes with our new and exclusive purple coloured sponge.

Speed:	120
Control:	80
Spin:	118
Sponge:	1,7 1,9 2,1 MAX mm
Sp. hardness:	47,5°
Strategy:	OFF+
Colours:	Red, black

AURUS SELECT

The innovative TIBHAR SSP technology (a thinner and smooth rubber surface combined with a thicker sponge) is a real positive for speed but also provides optimized spin ratings and fantastic sensation. AURUS SELECT is an allrounder and constitutes the perfect weapon for the experienced player seeking consistent performance.

The SELECT version of AURUS comes with our new and exclusive pink colored sponge.

Speed:	108
Control:	90
Spin:	115
Sponge:	1,7 1,9 2,1 MAX mm
Sp. hardness:	45°
Strategy:	OFF
Colours:	Red, black

GENIUS

GENIUS is obviously focused on spin, since more spin signifies more speed. More spin also means that the angle of the ball rebound is more upright conferring a bow-formed ball curve, giving more precision to your strokes and therefore putting your adversary under pressure.

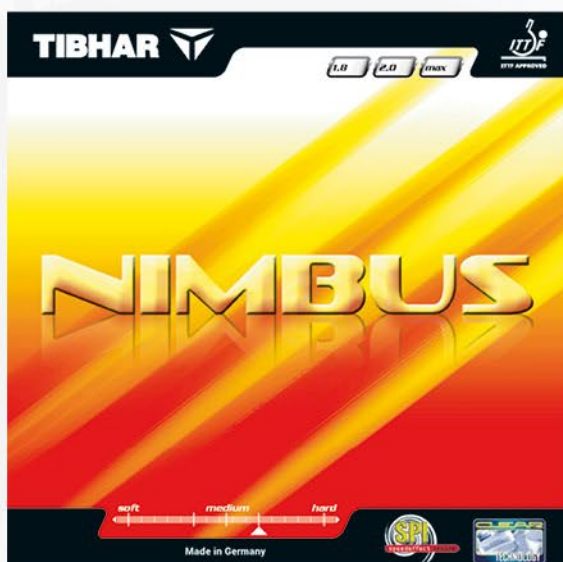

The pimple geometry enables a more dynamic and spin-rich game. Thanks to the caoutchouc composition the rubbers will last longer.

Speed:	107
Control:	94
Spin:	109
Sponge:	1,8 2,0 MAX mm
Sp. hardness:	47,5°
Strategy:	OFF+
Colours:	Red, black

RUBBER CLEANING ARTICLES START ON PAGE 72

NIMBUS

NIMBUS without the speed glue application has the incredible Spin-Speed-Dynamic plus the typical sound and ball contact feeling of a freshly speed glued rubber sheet. With a 45° sponge hardness it is not only the hardest NIMBUS rubber but also the fastest.

It provides offensive players positively with a first-class playing sensation and the necessary control.

Speed:	104
Control:	93
Spin:	99
Sponge:	1,8 2,0 MAX mm
Sp. hardness:	45°
Strategy:	OFF
Colours:	Red, black

NIMBUS SOFT

The soft version of NIMBUS will definitely impress all players who like playing with very SOFT offensive rubbers. NIMBUS SOFT with its 37.5° sponge hardness has an exceedingly perceptive ball control and was developed in such a way that, even in extreme playing situations, it will provide a large margin for technical error.

The very small speed loss is fully compensated by the enormous increase of control this rubber provides.

Speed:	100
Control:	95
Spin:	99
Sponge:	1,8 2,0 MAX mm
Sp. hardness:	37,5°
Strategy:	OFF-
Colours:	Red, black

NIMBUS SOUND

Thanks to the new SPI technology the playing sensation and sound are highly emphasized. The extremely SOFT sponge gives this rubber an extraordinary sound and high spin. It also gives players high potential for flexibility in stroke play.

This rubber is especially designed for players who are looking for more than just speed in a rubber - it provides extreme spin rotation which improves the delivery of a strong offensive stroke play.

Speed:	97
Control:	100
Spin:	100
Sponge:	1,8 2,0 MAX mm
Sp. hardness:	32,5°
Strategy:	OFF-
Colours:	Red, black

SINUS

TIBHAR SINUS was developed especially for high-performance sport. Because high-performance players always favoured harder sponges for a powerful play, TIBHAR SINUS was purposefully fitted with a relative hard sponge in response. It is almost impossible to surpass this rubber. During stroke execution players feel that they can transmit tremendous speed to the ball despite small movement.

The sponge combined with the adhering and elastic SINUS surface impresses by its rotation behaviour, giving advantages to the player during topspin strokes but also and especially during services and short exchanges, since it has plenty of spin reserves.

Speed:	107
Control:	92
Spin:	102
Sponge:	1,8 2,0 MAX mm
Sp. hardness:	47,5°
Strategy:	OFF
Colours:	Red, black

SINUS ALPHA

SINUS ALPHA possesses a softer sponge and develops its strengths especially during a passive game, because it provides an even better control. It is not as fast as its harder twin; however, it transmits unequalled precision during fast topspins and blocking balls. Balls played with this rubber have a longer and evenly curved trajectory, putting even more pressure on the opponent. TIBHAR SINUS ALPHA is the ideal rubber for players looking for unlimited dependability, in addition to acceleration.

Speed:	105
Control:	93
Spin:	103
Sponge:	1,8 2,0 MAX mm
Sp. hardness:	42,5°
Strategy:	OFF
Colours:	Red, black

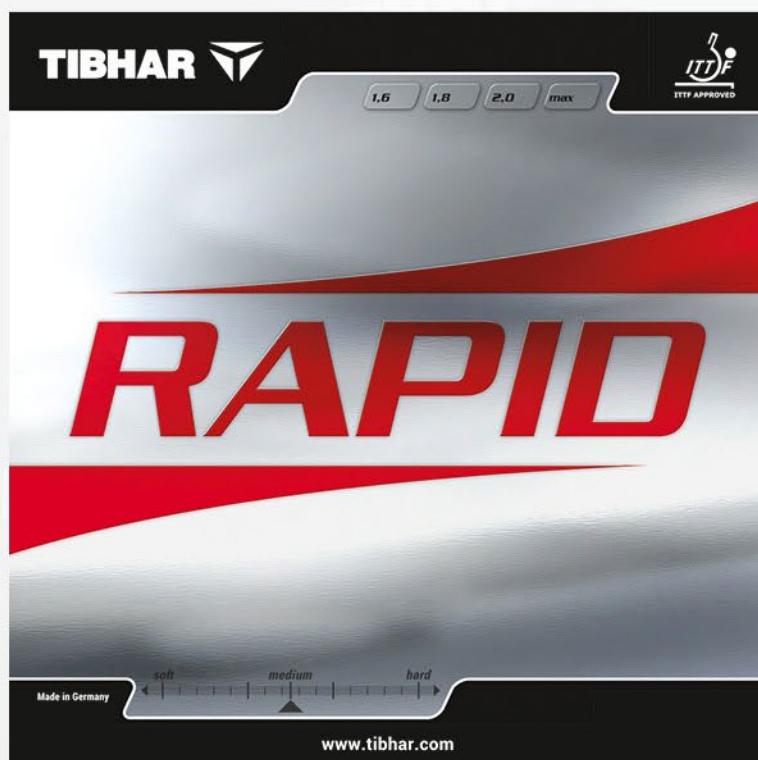

SINUS SOUND

Thanks to its pronounced ball curve the 'loud' variety of the SINUS series is making it the ideal partner to forgive almost all mistakes. SINUS SOUND is softer than SINUS or SINUS ALPHA thanks to its integrated speed-glue-effect sponge. It guarantees a great game sensation and optimal ball contact. Even during slow topspin exchanges. SINUS SOUND permits lots of spin and speed.

This rubber offers the balanced combination of sound, spin, speed, sensation and control. It is the ideal rubber for players whose recurring focus is ball sensation.

Speed:	102
Control:	95
Spin:	105
Sponge:	1,8 2,0 MAX mm
Sp. hardness:	35°
Strategy:	OFF-
Colours:	Red, black

RAPID

The most classical of all offensive TIBHAR rubbers! The mid-soft sponge and the extremely elastic surface make RAPID in 2.0 mm and max a very powerful offensive rubber for attackers operating with spin, counter spin and hard strokes.

With a sponge thickness of 1.6 mm and 1.8 mm RAPID is an ALL/OFF rubber with very good control, granting you all the necessary security in a block game.

Speed:	96
Control:	93
Spin:	95
Sponge:	1,6 1,8 2,0 MAX mm
Sp. hardness:	42,5°
Strategy:	ALL+
Colours:	Red, black

RAPID SOFT

The soft version of the classical RAPID rubber. Its construction is based on a sponge with a big portion of synthetic caoutchouc parts, which at first glance give the feeling of a softer rubber, but nevertheless enable the needed catapult effect and speed.

It is ideally adapted to an offensive game with a lot of variety and sensitive openings towards undercut. You will also feel very secure while serving with this rubber.

Speed:	95
Control:	95
Spin:	96
Sponge:	1,6 1,8 2,0 MAX mm
Sp. hardness:	35°
Strategy:	ALL+
Colours:	Red, black

VARI SPIN

Even without much training, this allrounder rubber is well controllable and guarantees lots of fun at playing. VARI SPIN is characterized by its elastic surface, which has a permanent adherence and big rotation reserves, enabling more variety to the player during ball exchanges and services.

The mid-soft sponge guarantees excellent control. With the thick sponge the rubber is ideal for an offensive, controlled spin game. With the thin sponge it is the perfect rubber for a secured defense.

Speed:	80
Control:	97
Spin:	100
Sponge:	1,2 1,5 1,8 2,0 MAX mm
Sp. hardness:	38°
Strategy:	ALL
Colours:	Red, black

VARI SPIN D.TECs

Due to the D.TecS technology this Allrounder is a wonder as far as ball control and spin are concerned. The built-in tension in the rubber surface and sponge offers a moderate acceleration, keeping the typical characteristics of VARI SPIN intact.

Especially conceived for Allround players, this rubber is easy to control.

Speed:	82
Control:	90
Spin:	100
Sponge:	1,5 1,8 2,0 MAX mm
Sp. hardness:	32,5°
Strategy:	ALL
Colours:	Red, black

SPEEDY SPIN

The classical Japanese attacking rubber was constantly updated to meet the latest technical requirements and standards. Extremely fast and rotation friendly, this rubber is the absolute weapon in anybody's hands – hard strokes, sharp topspins, a varied game at the table and above the table – everything is possible!

Additionally, its surface has a long life expectancy.

Speed:	96
Control:	94
Spin:	94
Sponge:	1,0 1,3 1,5 1,7 1,9 2,1 mm
Sp. hardness:	45°
Strategy:	ALL+
Colours:	Red, black

GAME

TIBHAR GAME is made in Germany and the ideal rubber for ambitious beginners and hobby players. Its soft, grippy rubber surface combined with a soft sponge result in a rubber for well-controlled counters, blocks and topspin play. Simply put: maximum balance for maximum fun in the game. With a choice of six colours, you can also create your own individual racket.

Speed:	100
Control:	70
Spin:	100
Sponge:	2,0 mm MAX mm
Sp. hardness:	32,5°
Strategy:	ALL
Colours:	Red, black, green, blue, violet, pink

SPEEDY SOFT

Ball control, speed, pimple effect - these are the most important characteristics for players who want to play an active, fast and always dangerous game at the table, while using short pimple rubbers. The relative short pimples guarantee an unbelievable acceleration. The absolutely well adapted SOFT sponge on the rubber surface permits a good control of the ball without affecting the desired 'pimple effect'.

Speed:	100
Control:	94
Spin:	55
Sponge:	1,0 1,5 2,0 mm
Sp. hardness:	45°
Strategy:	ALL+
Colours:	Red, black

SPEEDY SOFT D.TECs

We combined the short pimples of SPEEDY SOFT with the proven D.TecS technology. The result is astonishing because the short pimples do not only deliver speed during the open game, but additionally an increased disturbing effect for the adversary, especially during counter and block balls.

Speed:	103
Control:	93
Spin:	45
Sponge:	1,5 2,0 mm
Sp. hardness:	35°
Strategy:	OFF-
Colours:	Red, black

SPEEDY SOFT D.TEC S XD

SPEEDY SOFT D.TecS XD which belongs to the popular short pimple rubber series, confers with its catapult-loaded sponge and wide pimple heads the following advantages:

- Speedy balls in open play, which is especially noticeable with the new plastic balls
- The combination of a high portion of integrated natural rubber combined with the high elasticity of the pimple rubber permits high spin generation
- SPEEDY SOFT D.TecS XD is perfectly suited to block and counter play whilst retaining excellent control of the ball. It allows you to counter your opponent's disturbing shots with ease
- You have a direct influence on the typical disturbing effect of the pimples by changing the angle of the ball/bat contact zone
- Chop shots are easy to handle

Speed:	108
Control:	77
Spin:	55
Sponge:	1,5 1,8 2,0 MAX mm

NEW

SPEEDY SOFT MY

The Speedy Soft MY is a short pimple out rubber, which characterizes itself by its diversity. In the thinner sponge thicknesses, the rubber allows, thanks to an excellent control and a high spin potential, to play a defensive and controlled game. Like its homonym, one of the most famous defensive player in the world, Yuto Muramatsu, it is possible to realize extreme spin changes. In the thicker sponge thicknesses, the rubber is perfectly adapted to an offensive game in block and in counter, with the so typical pimple effect, thanks to the increased speed. Speedy Soft MY conveys a great sensation allowing a large variety of spin, from topspin to undercut.

Speed:	105
Control:	95

LEGEND

An extremely adhering surface combined with a very SOFT sponge confer this Chinese rubber European playing characteristics as well. This is the ideal rubber for players who are looking for much rotation and much sensation.

Speed:	87
Control:	90
Spin:	96
Sponge:	1,6 1,8 2,0 MAX mm
Sp. hardness:	42,5°
Strategy:	ALL-
Colours:	Red, black

VOLCANO +

Unbeatable Allround rubber at a very competitive price: this rubber possesses lots of energy. The controlled Allrounder has a weapon in his hands.

The mid-soft sponge congers sufficient energy reserves, while the adhering surface can create considerable rotations.

Speed:	78
Control:	96
Spin:	93
Sponge:	1,6 1,8 2,0 MAX mm
Sp. hardness:	37,5-42,5°
Strategy:	ALL-
Colours:	Red, black

SUPER DEFENSE 40

Defensive players most especially are more and more looking for a variable play, thus constantly increasing their material requirements. SUPER DEFENSE 40, with a relatively hard sponge, puts all the necessary instruments at the disposition of the defensive player, especially when playing disturbing actions.

The rubber delivers all the energy needed to execute very fast offensive actions while keeping a good control.

Speed:	64
Control:	99
Spin:	105
Sponge:	0,5 0,9 1,3 1,5 1,7 1,9 mm
Sp. hardness:	45°
Strategy:	DEF+
Colours:	Red, black

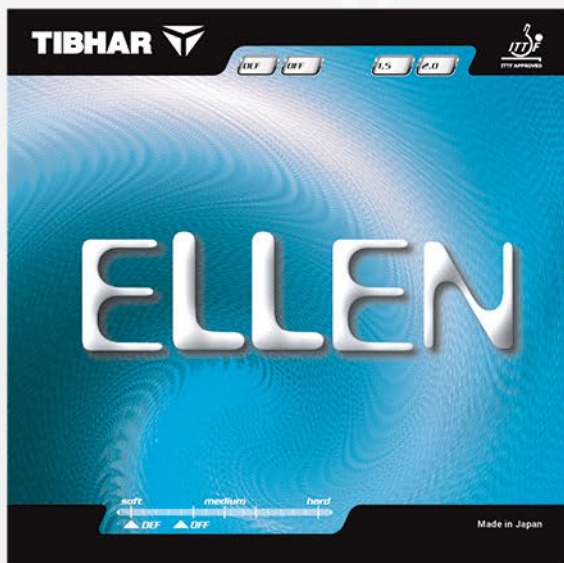

SUPER DEFENSE 40 SOFT

The soft version of SUPER DEFENSE 40 offers even better control with excellent potential for spin variations. It provides an allround defensive play and supports effective table strategies.

SUPER DEFENSE 40 SOFT offers the modern defensive player the possibility of not only putting his adversary technically under pressure but also applying even more tactical force in an allround defensive play.

Speed:	60
Control:	102
Spin:	105
Sponge:	1,3 1,6 mm
Sp. hardness:	35°
Strategy:	DEF
Colours:	Red, black

ELLEN DEF/OFF

This anti-topspin and anti-rotation rubber with disturbing effects is different because of its braking effect thus conferring an unequalled ball control. ELLEN DEF is the ideal rubber for the classical defensive player due to a SOFT sponge giving even topspin sensitive players an optimal control.

ELLEN OFF with a 10° harder sponge is the ideal rubber for a variable and active material game at the table.

Speed:	20/25
Control:	100/90
Spin:	50/40
Sponge:	1,5 2,0 mm
Sp. hardness:	28°/38°
Strategy:	DEF / DEF+
Colours:	Red, black

LEARN SPIN

This rubber was especially created for learning different stroke techniques.

The grippy surface combined with a SOFT sponge provides the necessary control and rotation.

Speed:	50
Control:	100
Spin:	60
Sponge:	1,5 mm
Sp. hardness:	30°
Strategy:	ALL-
Colours:	Red, black

NORM

Due to the adhering surface and the SOFT sponge, this rubber is especially adapted to the All-round game with rotation variations.

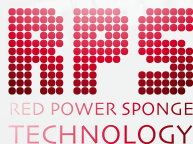

Speed:	55
Control:	90
Spin:	65
Sponge:	1,7 mm
Sp. hardness:	30-40°
Strategy:	ALL-
Colours:	Red, black

* Evolution rubbers: the hardness corresponds to the rubber hardness, not the sponge hardness only.

RED POWER SPONGE

Bright red, open-pored, spectacular – issued from a continuous development over many years, the RED POWER SPONGE technology constitutes the base of the high-performing TIBHAR EVOLUTION rubbers. This special sponge technology supports the required effect based on different playing situations: sensation and precision in a passive game, a slightly longer ball-bat contact time at the topspin opening and in addition the full power at aggressive attacking balls paired with the right dose of catapult effect.

Special attention was paid to these maximum performance professional versions to equally good playing characteristics in the topspin game at the table and from the half distance, but also all "straight strokes" such as block, counter attack and shot.

RED ENERGY SPONGE

The RED ENERGY SPONGE is similar in many areas to the already known RED POWER SPONGE, but offers additional variation possibilities for some current and future TIBHAR EVOLUTION rubbers. This means that each rubber can now be matched in every detail not only with two top rubber technologies but also with two sponge technologies. The RED ENERGY SPONGE versions not only offer enormous dynamics but also a very pleasant, surprisingly soft playing feel with relatively high sponge hardness. Elasticity and energy transfer have been optimized in all impulse directions. This ensures a high degree of precision and control in passive play and at the same time a linearly increasing impact energy and support during active play; especially in topspin duels.

PRO TENSION

The RED POWER SPONGE technology constitutes the basis of our high performance rubbers TIBHAR EVOLUTION offering a wide pallet of different playing characteristics: sensation and precision in a passive game, a more or less longer ball/bat contact time in a topspin opening game, pure power with just enough catapult effect in an attacking game.

UHR

Rubbers with the UHR (Ultra High Rotation) technology produce an extreme high rotation thanks to their adhering surface, which in turn increases the ball/bat contact time. This has for consequence that more of the desired rotation is transported into your game, no matter if serve, chop or topspin.

OPTRA

Thanks to the OPTRA technology, the rubber tremendously increases its spin potential. The liberated energy is transformed into acceleration: the more spin you realize, the faster your ball gets. The high spin of the ball stabilizes its trajectory: your game is more precise, although riskier.

SYNT EFFICIENCY

SYNT-EFFICIENCY means more dynamic and catapult effect with the new plastic balls, while deploying the same stroke level. Developed for playing with plastic balls.

SPI / SPI ADVANCED

Due to the SPI feature (Speed glue-Effect Inside System) designed by TIBHAR, speed gluing belongs to the past. This SPI system incorporates all explosive dynamics of speed glue without having to actually glue-up. The speed glues of yesteryears belong to the past.

SSP CATAPULT TECHNOLOGY

SSP stands for "Super-Sized Pad" – a brand new technology consisting in a much thinner rubber surface in favor of a thicker sponge. As you shift less mass, the power transfer from the rubber to the ball will function optimally – higher speed, especially in small exchanges such as flips, banana flips, blocks and spin blocks above or near the table. The rubber with the maximum thickness has a thicker sponge thanks to the thinner rubber surface. A thicker sponge means more power and acceleration potential. The SSP technology confers more potency at a higher speed, mainly in topspin and counter topspin exchanges.

CLEAR TECHNOLOGY

This technology has been developed to drastically reduce the diameters of the small parts which result from chemical reactions with a very beneficial consequence for table tennis rubbers. Through precise vulcanization the rubber now benefits from improved dynamics, which increases the rubber's durability.

D.TECs

Besides a gluing technique, the basis of the D.TecS technology is also the utilization of selected, innovative polymers in the elaboration of the rubber surface and sponge. D.TecS rubbers have the same playing characteristics than speed-glued rubbers: they also possess their unique sound.

HYBRID ZC

HYBRID ZC

Hybrid ZC is a high tech composite material of Zylon and carbon fibres formed in an autoclave, such as parts for aircrafts or racing vehicles. As the production runs with the same precision, it confers an unequaled and constant level of quality. Hybrid ZC combines the high repulsive power of carbon with the strength and elasticity of Zylon to provide a stable balance of powerful attacking and feeling for defense.

DYNEEMA

FORTINO with Dyneema®, the world's strongest fiber™ has set the bar at a new high in the blade market. The innovative combination of carbon with Dyneema®, the world's strongest fiber™ opens a new era in blade production. The use of this special fabric provides the best value in terms of bend-resistance and hardness. "Ultra-light - super strong", the strength to weight ratio makes the Dyneema®, the world's strongest fiber™ the strongest fibre in the world. In addition, vibration is reduced to a minimum, the sweet spot of the blade is dramatically increased. The very stiff carbon fibers generate high catapult values with resultant high speeds.

CARBON TECHNOLOGY

Carbon fibres obey to a special fabrication order which confers more hardness but also more elasticity to your blade, thus enabling more powerful balls, even when deploying very little effort in your game.

SENSORY AMPLIFIER

The new S.A.M technology in the handle optimizes the player's response to his opponents shots through enhanced feel, improved anticipation and instinctive shot selection.

SPONGE GRIP SYSTEM

The newly developed grip comfort system „SGS“ (Sponge-Grip-System) ensures an optimal transfer of the impulses to the hand when the ball touches the racket shape, out of what a clearly more sensitive ball sensation results. The middle part of the grip composed of foam permits an excellent and very comfortable handling of the bat.

HYBRID ZAC

HYBRID ZAC

Hybrid ZAC is a high-end blended mesh fabric combining the blended mesh fabrics Hybrid ZC and Hybrid AC. This combination reunites the dynamics of the Hybrid ZC with the control and stability of the Hybrid AC. Hybrid ZAC is an allrounder within the hybrid series.

KRYPTO CARBON

Krypto Carbon is composed of carbon fibres with a special structure enabling the fibres with the same weight to have more volume. This extra space confers the blade a better ball sensation, more control without reducing the given power of carbon fibres. The player feels the ball longer when it hits the sweetspot.

EXBO

The abbreviation EXBO stands for Extreme Bounce Layers. With this technology, a reinforcement of the catapult effect is achieved by a special kind of gluing the veneer layers.

CONTACT LIGHT SYSTEM

Our simple but genius way of making the grip lighter and improving the ball control: For a better ball contact and a better control, it is absolutely important that the grip, which transmits the effects resulting from the ball contact on the racket shape, should be full. The result? Full grips with an ultra light Balsa centre, optimizing the transfer of the racket shape vibrations to the hand of the player. Causal connection: lighter grip > shifting of the centre of gravity > centre of gravity = point of impact between ball contact and racket shape > optimization of control and speed.

SMALL HANDS

Since children have smaller hands and hence less strength, we developed special blades for the child's hand. These blades feature a narrower and shorter concave grip, which fits perfectly into the child's hand. The racket shape we created based on this concept is lighter and handier. Blades featuring the Small Hands technology can be played while deploying very little effort.

ALEXIS LEBRUN ALL+

The 5-ply wood Alexis Lebrun ALL+ is an allround blade with a crisp attack that can be used in an extremely flexible way: depending on your choice of rubbers, this blade noticeably changes its character and yet remains absolutely controllable over the entire range. Choose Alexis Lebrun ALL+ if you are looking for a more powerful, variable allround blade.

Speed:	7	Plies:	5
Control:	9	Strategy:	ALL+
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

ALEXIS LEBRUN OFF

A 7-layer medium hard blade for offensive players with the special touch! Layers of hybrid carbon fibres around the core of the blade care for an optimized transfer of the energy. The resulting optimized ball curve ideally counters aggressive balls from at half distance or near the table. The blade remains controllable thanks to the large sweet spot. Alexis Lebrun OFF is a little bit harder than the OFF- version of his brother.

Speed:	8+	Plies:	5+2
Control:	8	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

ALEXIS LEBRUN KRYPTO CARBON

The Alexis Lebrun Krypto Carbon is tailor-made for its homonym and perfectly suits his spectacular offensive game with constant changes of speed and spin, which often drive his opponents to despair. Two layers of Krypto Carbon, a carbon fabric made of voluminous fibres with a special structure, in combination with precisely matched veneer layers form a power wood with fine feedback of the strokes, which perfectly suits players who want to surprise their opponents with different variations at any time - just like Alexis Lebrun.

Speed:	9	Plies:	5+2
Control:	7	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, straight, CPN

FELIX LEBRUN OFF-

The ideal blade for allrounders and offensive players who privilege a varied game. Felix Lebrun OFF- has a good balance between speed, elasticity and ball feedback and yet remains absolutely controllable. Two layers of synthetic fibres confer stability and generate high ball trajectories. TIBHAR Felix Lebrun OFF- is a fantastic offensive blade available at a very good price/performance ratio.

Speed:	8	Plies:	5+2
Control:	8-	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

FELIX LEBRUN ALL

A perfectly tuned combination of 7 veneer layers makes Felix Lebrun ALL an allround blade with exceptional dynamics and excellent control values. Its soft touch with good ball feedback and its light weight are making the Felix Lebrun ALL blade the right choice for allrounders looking for a blade with a good balance between speed and control.

Speed:	7-	Plies:	7
Control:	9+	Strategy:	ALL
Weight:	85 ±5 g	Handles:	concave, anatomic, straight, CPN

FELIX LEBRUN HYPER CARBON INNER

The blade Felix Lebrun Hyper Carbon is as extraordinary as its homonym. Developed with the experts from TIBHAR according to the wishes of the young penholder player from France. The blended fabric of layers of synthetic carbon fibres placed directly around the core veneer provides the high stiffness that a fast-attacking blade requires. This positioning, however, results in a longer and more sensitive contact with the ball, in contrast to the outer layers of fabric. This blade is perfectly adapted to players who privilege a fast and attacking game. The blended fabric of Hyper Carbon from TIBHAR is ideal for those looking for the catapult effect and stability of carbon, but who also value good ball feedback. With the Hyper Carbon Inner, two-layers of carbon mixed with synthetic fibres are placed directly around the core veneer. This results in a blade that can handle powerful attacking balls as well as sensitive and varied strokes.

Speed:	9-	Plies:	5+2
Control:	8-	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, straight, CPN

NEW

ÁLVARO ROBLES ESTOQUE

We have developed the blade ALVARO ROBLES ESTOQUE in close cooperation with the 2024 European champion in mixed doubles. 5 wood layers combined with 2 carbon layers under the outer veneer confer to the ESTOQUE its direct touch and exceptional energy. This mainly pays off when playing from half-distance and in topspin-topspin situations, giving you a great playing sensation due to the very even ball bounce, as well as the necessary level of speed to counter your opponent with firm counter-spins. Above the table or in passive situations, you will play a very controlled game thanks to the blade's optimum feedback.

Speed:	9	Plies:	5+2
Control:	7	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

DYNAMIC JC

The blade by Darko Jorgić – DYNAMIC JC – uses the Dyneema carbon fibre. Consisting of 5 wood plies and 2 layers of Dyneema carbon fibres, DYNAMIC JC confers enormous power and penetrating force to your topspin strokes. Since the Dyneema carbon fibres do not lie directly underneath the top veneer, the touch feeling is not only determined by the Dyneema fibre. Power, control, flexibility are the main qualities of DJC but also of Darko's playing style!

Speed:	9	Plies:	5+2
Control:	8	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

DYNAMIC J7

DYNAMIC J7 is a hard attacking blade with plenty of feel. The thicker core veneers confer the power, while the thinner outer veneers provide the fine tuning in terms of catapult, hardness and control over the table. The blade's dynamic combination and characteristics make it an exciting option for all offensive players!

Speed:	8+	Plies:	7
Control:	9-	Strategy:	OFF-
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

MK 7

MK 7 is the ideal blade for players looking for a real OFF blade with high speed and spin characteristics and a good ball feedback. The 7 precisely matched layers of this blade allow to switch easily from one playing technique to another and thus generate hard topspins on undercut, play at half distance, far or near the table - the extraordinary ball feedback allows to perfectly master one's game and hence put the adversary under pressure.

Speed:	9-	Plies:	7
Control:	8	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, anatomic, straight, CPN

MK CARBON

The TIBHAR MK Carbon has a special carbon structure comprising two layers of crypto-carbon fabric. When combined with specially selected veneers, the result is a blade with a unique playing feel; thanks to the extended ball/sweet spot contact you have better control over your strokes without losing the power provided by carbon blades. The Japanese craftsmanship is present in each fiber of this blade. Kenta Matsudaira was personally in charge of the development and the result is that the MK Carbon meets his exact demands.

Speed:	9	Plies:	5+2
Control:	7+	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, straight, CPN

MK ALL

This 5-ply blade was conceived for the player who's main focus is to remain „the master“ of her/his game. High control coupled with an optimal ball bounce characterize MK ALL. This guarantees enormous safety and precision in all strokes - hard topspins as well as controlled blocking balls can be optimally placed and executed with this blade.

Speed:	6+	Plies:	5
Control:	9	Strategy:	ALL+
Weight:	80 ±5 g	Handles:	concave, anatomic, straight

MK JUNIOR

We have reduced the size of the handle and bat shape of the 5-ply blade MK JUNIOR to adapt it to the smaller hand of young players. MK JUNIOR is characterized by a good feel, optimized control. Young players usually put the emphasis on a spin oriented, flexible and uncompromised game.

Speed:	6	Plies:	5
Control:	9	Strategy:	ALL
Weight:	75 ±5 g	Handles:	concave

ZODIAC LIBRA ZAC

The art of table tennis blade development consists of reaching the perfect balance between control and penetration force. The latest demands for table tennis blades are a guarantee of the very best balance of control and offensive power for a controlled offensive game, combined with the feeling of being 'master of the game' in all circumstances.

Clearly, LIBRA focuses on playing an offensive game and taking the right decision at the right time to counter your opponent's game. Counter with more energy and dominate counter rallies without compromise. Thanks to the new ZAC Composite Technology, the Zodiac series allows you to go to the limits of speed and energy transfer, with no loss of control. The perfect balance!

Speed:	9-	Plies:	7
Control:	8	Strategy:	OFF
Weight:	85 ± 5 g	Handles:	concave, straight

HYBRID AC INSIDE

The HYBRID AC fibers placed directly on the inner veneer provide the necessary stability with almost unlimited variability. The difference to Shang Kun ZC is that the ball contact is more intensive and also longer. This opens up more possibilities and is therefore ideal for the flexible attacking player.

Speed:	8	Plies:	7
Control:	8	Strategy:	OFF-
Weight:	85 ± 5 g	Handles:	concave, straight, CPN

HYBRID AC

KRATOS

KRATOS is a 5-ply offensive blade combining carbon fibres and the Japanese precious wood Hinoki. The interplay of the high-energy carbon fibre layer and the energetic and fast Hinoki gives this blade an extremely powerful ball impact point. This allows the blade to open the game extremely aggressively (powerful), but also to counter the opponent's attacking balls.

The special feel of the Hinoki outer layer conveys control and also gives the blade the necessary touch to be able to act variably in serve/return situations, despite its enormous acceleration. This allows you to optimally prepare your attacking strokes. The uncompromising nature of KRATOS makes it the ideal choice for modern attacking players who want to print their mark on the game with high speed and hardness in their shots.

Speed:	10-	Plies:	3+2
Control:	6	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, straight

KINETIC SPEED

The secret of this blade lies in its unusual composition from synthetic fibres. They create an extraordinary sweet spot and an unsurpassed sensation when serving. Perfect for an offensive game both at the table or at mid distance. Even in highspeed rallies, KS Kinetic Speed is totally controllable. Reaching new heights, this high-quality blade combines lightness, flexibility and stability.

Speed:	9	Plies:	7
Control:	7	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

NUYTINCK HYBRID ZC

This high-tech blade is composed of two layers of newly developed synthetic fibres making it ultra-light and stable, while at the same time conferring a very precise playing sensation. Cédric Nuytinck collaborated with our TIBHAR experts in the development of this blade; his focus was to produce a 7-ply blade that he could use, that is dynamic and mid hard in feel. The innovative Nuytinck HYBRID ZC – extreme speed, catapult friendly and precision quality.

Speed:	9-	Plies:	7
Control:	7	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

FORTINO FORCE

A 7-ply offensive wood of the TIBHAR SUPER STRONG SERIES, honouring the name „Force“.

It is technically hard to create fast aggressive offensive blades but the concept of core reinforced fiber blades, which in term of speed and power are able to compete with outer synthetic fiber blades will be a surprise! The basis for this is the use of an innovative fabric made from carbon and Dyneema®, the world's strongest fiber™, which provides an excellent uniform bounce and minimises annoying vibrations. In addition, the special choice and combination of the wood veneers makes it a very powerful attacking blade for an uncompromising offensive game. The FORTINO Force with inside synthetic fibers is designed for an aggressive topspin game, amazingly direct but also very precise for all strokes.

Speed:	9+	Plies:	5+2
Control:	8-	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

FORTINO PERFORMANCE

The offensive blade with the highest feel among the TIBHAR SUPER STRONG SERIES.

This 9-ply offensive blade has power in any situation, but also an excellent ball feedback thanks to its perfectly matched veneer combination. Thanks to the use of the high-end fabric made from a combination of carbon and Dyneema®, the world's strongest fiber™, the sweet spot is increased, vibrations are reduced to the minimum and the necessary stability and dynamic are kept. The fabric was placed close to the core, so that this FORTINO variant is perfectly suited to modern table tennis sports, enhancing speed, catapult reserves and the necessary control. With pride we can say there is no other wood with this Setup currently on the market. A real innovation, a fiber-reinforced attack wood of the latest generation, consisting of 9 layers and still relatively light and with great touch – TIBHAR FORTINO suits the offensive game and puts the emphasis on punchy but controlled attacking games!

Speed:	8+	Plies:	7+2
Control:	9	Strategy:	OFF-
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

FORTINO PRO

The fastest blade among the TIBHAR SUPER STRONG SERIES.

Thanks to a fabric made from carbon and Dyneema®, the world's strongest fiber™, this 7-ply wood provides good stability, vibrations are reduced to the minimum and the sweet spot increased.

Offensive players who do not like compromises and need to make the most of their blade in all playing situations are guaranteed good ball feedback. The high-end fabric of this FORTINO variant is located under the surface layers and permits a harder service, you can play dynamic topspins with more penetrative power. The high-end fiber comes into its own in a game of block and counter and the penetration power of your strokes is extraordinary. Especially with regard to the different plastic balls and needs the realization of this wood took very long. The result is a next-generation attack wood and an ideal solution for offensive players, not only in professional sports.

Speed:	10	Plies:	5+2
Control:	7+	Strategy:	OFF+
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

FORTINO PRO DC INSIDE

FORTINO PRO DC INSIDE both combines the advantages of the high-tech fibre Dyneema® with those of carbon fibres. Dyneema® fibres confer precision and dynamic, while providing to your topspin strokes the necessary penetrating force, even when you are far from the table. The disposition of the fibres directly above the core veneer, combined with a corresponding natural wood composition prolong the ball contact time, making the touch much softer than with FORTINO PRO, where the Dyneema® carbon structure is further outwards. FORTINO PRO DC INSIDE is a modern offensive blade - catapult friendly, balanced, plenty of feel and flexible.

Speed:	9-	Plies:	5+2
Control:	7	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

BALSA DEF 25

The BALSA DEF 25 is the ideal weapon for a defensive game. The oversize yet lightweight blade and the Balsa core veneer allow the highest control in all defensive strategies. Maintain high control in all situations!

Speed:	3+	Plies:	5
Control:	10	Strategy:	DEF
Weight:	75 ±5 g	Handles:	concave, anatomic, straight

BALSA ALLROUND 50

In the development of the BALSA ALLROUND 50 we put the focus on both control and ball sensation. It allows you to play both a controlled topspin game, or block and counter shots at the table in complete comfort. The 5.0 mm thick Balsa core is the basis for an optimal balance between speed and control.

Speed:	7-	Plies:	5
Control:	9	Strategy:	ALL
Weight:	75 ±5 g	Handles:	concave, anatomic, straight

BALSA FIBRE OFF 60

The Balsa Fibre OFF 60 is designed for players who like to play an offensive game but at the same time want to place very precise shots. Compared to the FIBRETEC 75 it has more control for your passive game. It is extra light with good speed potential and is very sensation friendly. The fibreglass layers confer high stability and increase the sweet spot.

Speed:	8	Plies:	7
Control:	8	Strategy:	OFF-
Weight:	75 ±5 g	Handles:	concave, anatomic, straight

BALSA FIBRETEC 75

An extra light blade. BALSA FIBRETEC 75 is perfectly suited to aggressive offensive rallies. Its 7.5 mm thick Balsa core provides high speed and an enormous potency. The two layers of fibreglass increase the stability and allow you to play, thanks to the greater sweet spot, fast attacking topspin strokes.

Speed:	9-	Plies:	5
Control:	8-	Strategy:	OFF
Weight:	75 ±5 g	Handles:	concave, anatomic, straight

SAMSONOV FORCE PRO

The blade of the multiple European Champion and World Cup winner impresses by its varied speed reserves. The Limba outer layers confer its perceptible power. The midst and central layers permit an excellent ball control to put your adversary under pressure.

Speed:	9-	Plies:	7
Control:	7	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

FORCE PRO BLACK EDITION

The brother of the SAMSONOV FORCE PRO blade; Vladi Samsonov, our multiple European and World Cup champion personally tested the prototype and said: "you can really feel each ball on the blade, no matter if you hit it hard or slow". It features excellent speed and is supported with good acceleration. Perfect for players who prefer sensation, speed and spin.

Speed:	9-	Plies:	7
Control:	7+	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

SAMSONOV PURE WOOD

5-ply Allround blade, maintaining the playing characteristics that Vladimir Samsonov is renowned for after two decades as a world table tennis leader.

- Extraordinary playing sensation and great control
- Perfect placement in block and topspin

PURE WOOD produces an unlimited range of spins, and of course the necessary speed that makes the required acceleration possible. Enjoy the great characteristics of this high quality blade, which sits perfectly in your hand, thanks to the top quality ply combination.

Speed:	7	Plies:	5
Control:	9+	Strategy:	ALL+
Weight:	80 ±5 g	Handles:	concave, anatomic, straight

VS UNLIMITED

The VS UNLIMITED blade supports the player due to the large sweet spot and the higher control associated with the offensive game. The combination of the high-tech synthetic fibres, low vibration, carbon fibre and its optimal transfer of energy, is perfect for a variable spin attack and topspin game from half distance. What stands out is clearly the optimal transfer of energy of your own strokes on the ball and the possibility to counter the offensive strokes of your opponent's, with your own offensive strokes. This blade provides a good balance between hardness and sensation for an offensive game. 5-ply + 2 carbon fibres mix.

Speed:	9	Plies:	7
Control:	8+	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

DRINKHALL ALLROUND CLASSIC

Several key ingredients are necessary for a modern allround game: a light balance, feeling, control and attacking potential. The 5 plies of ayous and lima woods are perfect for both experienced and developing players. Play a full range of strokes in total confidence.

Speed:	6+	Plies:	5
Control:	9	Strategy:	ALL
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

DRINKHALL POWER SPIN CARBON

Paul's signature blade providing balance and power both at the table and at mid distance. Stable with tremendous control and touch when playing a short game, despite the requirement for high speed characteristics. The combination of high quality arylate carbon and special wood plies creates a fantastic sweet spot and elastic feel that helps enable him to maintain the upper hand in fast counter spin rallies.

Speed:	9+	Plies:	7
Control:	7+	Strategy:	OFF
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

H-1-9

We changed the design, the racket shape and the weight of this legendary wood in order to adapt it to the modern offensive game. The rough edges of the racket shape to the handle were smoothened for a nicer feeling in the hand. Hinoki is extremely hard and fast and confers the player an excellent control. After the glue ban, this blade confers enough speed and a powered attacking game. The H-1-9 is available in all grip shapes.

Speed:	10+	Plies:	1
Control:	5-	Strategy:	OFF+
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

H-3-9

Like its brother, H-1-9 is 100% made from Hinoki and is a 3-ply wood: two external thinner layers and one thicker central layer increase the ball control with minimal speed loss. It is more dynamic than the H-1-9 and also better controllable. The rough edges of the racket shape to the grip were smoothened. This blade is available in all grip shapes and constitutes the ideal alternative for the offensive player after the glue ban.

Speed:	9+	Plies:	3
Control:	6-	Strategy:	OFF+
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

IV-L

The very specific plywood combination gives its distinguished identity to this soft and fast blade. TIBHAR IV-L is just different from normal classical ALL/OFF blades. This blade amazes by its excellent ball feeling at sufficient speed and is perfectly suitable for allround and various attacking players who emphasize control.

Speed:	7	Plies:	4
Control:	9-	Strategy:	ALL
Weight:	85 ±5 g	Handles:	concave, anatomic, straight, conic

IV-L Balsa

TIBHAR has made a superior Allround blade of the newest generation. This blade has principally been designed for players who are looking for good ball contact and plenty of control. The outer layers are made of the famously tried and tested ayous wood, which is both soft and fast and enables a large variety of active and passive strokes. The essential heart of the blade is constructed with balsa and occumé wood making this blade very light with an exceptional touch.

Speed:	6	Plies:	6
Control:	9+	Strategy:	ALL
Weight:	70 ±5 g	Handles:	concave, anatomic, straight

IV-L LIGHT CONTACT

This TIBHAR allround classic presents itself as an ALL/OFF blade due to the applied 'Contact light System'. It is lighter although it has a bigger racket shape. The grip system shifts the centre of gravity and makes this blade fast and more controllable. You will enjoy playing with this blade if you look for the combination of a secured allround play and powerful topspins.

Speed:	7	Plies:	4
Control:	8	Strategy:	OFF/ALL
Weight:	80 ±5 g	Handles:	concave, anatomic, straight

IV-S

This blade offers an extraordinary ball feeling having its own character among offensive blades. It is a soft and fast blade which gives you a lot of speed and precision as well as sufficient safety for your spin-oriented offensive game. It gives you the feeling that it adapts to your play.

Speed:	8+	Plies:	5
Control:	7+	Strategy:	OFF-
Weight:	85 ±5 g	Handles:	concave, anatomic, straight, conic

RAPID CARBON LIGHT

It combines the lightness and extraordinary playing sensation of Balsa heart veneers with the power and precision of high-tech carbon fibres. It is a lightweight blade enabling a good control, even at high speed. Its strengths are fast and powerful strokes at the table and at half distance.

Thanks to the lightweight and the two carbon layers, players have the necessary decisiveness away from the table to play a brilliant offensive game.

Speed:	9+	Plies:	7
Control:	6-	Strategy:	OFF+
Weight:	75 ± 5 g	Handles:	concave, anatomic, straight

BLACK CARBON

Developed and conceived in collaboration with blade specialists from China and Korea, this stiff blade offers extreme acceleration possibilities and is based on a brand new carbon concept. This is a dexterous and light-weight blade design offers a new visual highlight thanks to its carbon development and optimizes the speed factor especially for players who are no longer using speed glue but are eager to compensate for the loss of speed. It will be an ideal complement to TIBHAR's high-tech SPI and D.TecS technology rubber ranges.

Speed:	9+	Plies:	7
Control:	6+	Strategy:	OFF+
Weight:	85 ± 5 g	Handles:	concave, anatomic, straight

SAMSONOV CARBON

Developed in association with Vladimir Samsonov, this blade is uncompromising. It is the ideal blade for players willing to dominate the table. Especially developed carbon layers combined with sensitive, but nevertheless fast Ayous plywood make this blade very powerful.

Speed:	10	Plies:	7
Control:	5+	Strategy:	OFF+
Weight:	90 ±5 g	Handles:	concave, anatomic, straight

TRIPLE CARBON

The weapon for the uncompromising attack. The three carbon layers confer both high stability as well as an absolute big speed reserve. The Ayous layers and the Balsa middle layers provide the necessary control. TRIPLE CARBON is very well suited for players preferring speed and willing to compensate the loss of speed due to the ban of speed glues.

Speed:	10	Plies:	11
Control:	6-	Strategy:	OFF+
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

SAMSONOV ALPHA

The combination of precious plywood with its extra strong middle layer guarantees a better ball resilience with more control. Even in passive situations the player can switch into an offensive game to counter the adversary's fast balls. Aggressive block balls can be realized with SAMSONOV ALPHA.

Speed:	8	Plies:	5
Control:	8-	Strategy:	OFF-
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

TECHNO POWER CONTACT

All+ blade conceived with Vladimir Samonov's assistance, this light slower blade still confers enough speed. It distinguishes itself by the elaboration of different players for the forehand and backhand, resulting in different playing characteristics. The ply of the forehand is faster whereas the ply of the backhand is for the control. Conceived with the special racket shape and 'Contact light System' to transfer the vibrations resulting from the ball control into the player's hand.

Speed:	7- / 6-	Plies:	5
Control:	8- / 9	Strategy:	ALL+
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

SAMSONOV PREMIUM CONTACT

Vladimir Samonov has designed this plywood layer combination producing a perfectly balanced offensive blade. The grip 'Contact Light System' and the selected layers confer high speed and lots of control. After the ball contact, the racket shape swings slightly. These vibrations are transferred into the hand of the player thanks to the 'Contact light System'.

Speed:	8-	Plies:	5
Control:	8	Strategy:	OFF/ALL
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

STRATUS POWERWOOD

This 5-ply offensive blade is characterized by an unlimited flexibility. From the hard flip to a finer topspin with lots of spin, you will be able to realize the whole pallet of the stroke play for the offensive game with STRATUS POWERWOOD.

Speed:	9	Plies:	5
Control:	7+	Strategy:	OFF-
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

STRATUS POWERDEFENSE

This relatively hard defense blade was built for a modern defensive game. The blade head is a little bit bigger than the norm. This lightweight blade will enable the player to react fast to almost his entire adversary's strokes, putting him under pressure, no matter where the player is situated at the table.

Speed:	6+	Plies:	5
Control:	10	Strategy:	ALL
Weight:	80 ±5 g	Handles:	concave, anatomic, straight

SAMSONOV STRATUS CARBON

TIBHAR selected high-quality wood types and combined them with a new generation of Kevlar carbon: the ideal prerequisite for an offensive but still controllable game. The carbon confers the needed hardness and stability in your strokes. Great playing sensation!

Speed:	10-	Plies:	7
Control:	7-	Strategy:	OFF+
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

CHILA OFF

The blade of the former European Team Champion Patrick Chila impresses by its varied speed reserves. The Limba outer layers confer its perceptible power. The midst and central layers permit an excellent ball control to put your adversary under pressure.

Speed:	7+	Plies:	5
Control:	8	Strategy:	OFF
Weight:	75 ±5 g	Handles:	concave, anatomic, straight

BALSA

LEBESSON

The blade of the French National Champion 2009, 2017 and European Champion 2016, Emmanuel Lebesson, stands for modern, athletic attacking table tennis of the French school – always keeping the opponent under pressure with uninterrupted action. The extra hard inner veneer enables the necessary tempo. You should give it a try – it surely isn't as difficult as it may seem...

Speed:	8	Plies:	5
Control:	8	Strategy:	Off-
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

SZÖCS SIGNATURE 1

This 7-ply full blade is the ideal weapon for an aggressive and powerful game at the table. Speed and balance characterize this blade at the half distance. The combination of hard inner veneers and more delicate outer veneers make up the qualities to which the Romanian National Top player, Bernadette Szöcs, adheres.

Speed:	8-	Plies:	7
Control:	8+	Strategy:	OFF-
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

LI QIAN

The blade of the 2018 European Champion. 5-ply high quality Japanese defensive blade characterized by extraordinary balance and perfect control. The 5-ply allround combination offers optimal ball security and is perfectly suited to aggressive counter rallies. Perfect for the defensive player who needs total control in all situations.

Speed:	4-	Plies:	5
Control:	10+	Strategy:	DEF
Weight:	85 ±5 g	Handles:	concave, straight

ALLROUND CLASSIC

Light Allround blade of classical construction and an exceptional balance between speed, control and ball feeling thanks to the special arrangement of the plywood layers and their gluing. Ideal for Allround players who prefer lots of ball feeling during topspin with precise ball control during block and short exchanges.

Speed:	6+	Plies:	5
Control:	8+	Strategy:	All
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

NIMBUS ALL

This blade was especially created for the spin dynamic ALL/OFF game and is characterized by its balanced ratio of speed versus control. With this lightweight blade, the player will feel comfortable in any situation. It is ideally combinable with the softer rubbers of the NIMBUS family: NIMBUS SOFT and NIMBUS SOUND. Special surface varnish for optimal protection against rubber removal and glue remains.

Speed:	8-	Plies:	7
Control:	9+	Strategy:	ALL+
Weight:	80 ±5 g	Handles:	concave, anatomic, straight

CO-S-3

The ideal blade for the passive, defensive player, looking for maximum braking effects and ball control. Combined with a sponge rubber, this 3-ply wood enables extreme undercut, while combined to a long-pimple rubber, reversed spins can be realized.

Speed:	3+	Plies:	3
Control:	10-	Strategy:	DEF
Weight:	85 ±5 g	Handle:	straight

DEFENSE PLUS

The TIBHAR specialists for defensive play have developed a blade which makes life easier. This blade remains light although it features a bigger racket shape. A special combination of the plywood layers with two layers of balsa and the oversized blade deliver sufficient braking effects when playing defensive spin. Consequently a dream-like ball feeling is sustained by good acceleration that makes your surprise attack possible.

Speed:	3+	Plies:	5
Control:	10	Strategy:	DEF
Weight:	75 ±5 g	Handles:	concave, straight

CHAMP

TIBHAR CHAMP is the optimal blade for players preferring rigorous offensive games. This 4-ply wood represents a high-quality alternative for the beginner as well as for the experienced player although its price is very favourable.

Speed:	7	Plies:	4
Control:	5	Strategy:	ALL
Weight:	85 ±5 g	Handles:	concave, anatomic

MATCH

TIBHAR MATCH is a sophisticated 5-ply Allround blade with offensive character. This especially favourable blade and its price are also very interesting for the experienced player.

Speed:	7-	Plies:	5
Control:	6-	Strategy:	ALL
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

SMASH

TIBHAR SMASH is an Allround blade with especially convincing playing characteristics and a favourable price. This lightweight blade is ideal for players giving their preference to non-heavy blades.

Speed:	6-	Plies:	4
Control:	7-	Strategy:	ALL
Weight:	85 ±5 g	Handles:	concave, anatomic, straight

SAMSONOV PREMIUM JUNIOR

SAMSONOV PREMIUM CONTACT developed and created together with Vladimir Samsonov is also available for children and young players. The racket shape and the grip of this High-End blade were reduced to perfectly fit children's hands. Like its big brother it confers a great ball feeling, while keeping high tempo thanks to the flexible plies.

Speed:	7	Plies:	5
Control:	6	Strategy:	ALL+
Weight:	75 ±5 g	Handle:	concave

- Balls not included

OUTDOOR BALLS

- 40+ ball, ideal outdoor ball
- Long-lasting ABS material
- Increased weight for good outdoor characteristics

OVERVIEW

Ball family	Articles	Information
TIBHAR SynTT NG	★★★ 40+ SynTT NG	This ball is a new version of the SynTT ball. It combines the best quality of roundness, hardness and longevity. The NG ball offers a high, even ball bounce at a little less spin compared to the SynTT ball.
	BASIC 40+ SynTT NG	
TIBHAR SL	★★★ 40+ SL	Seamless table tennis ball with high, even ball bounce. This ball produces less rotation than the SynTT and the celluloid balls.

Colours frame / undercarriage:

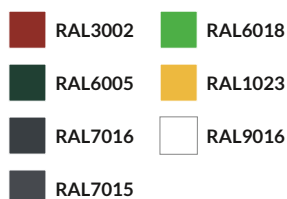

7000 W STANDARD COLOURS / GALVANIZED

Tibhar 7000 W is an ultra-robust and very weather resistant table. Visually it catches the eye and is the perfect alternative to concrete tables and a much better value for money. A configurator is at your disposal to choose the colors that suit you. The very thick 9 mm melamine resin top combined with a solid base, equipped with a metal net with rounded corners, combine the optimal characteristics for playing table tennis in ideal conditions. The 7000W table is perfectly suited for campsites, parks, swimming pools and all other public places.

Board thickness: 9 mm
Frame: 80 x 40 mm

6000 W

6000 W

The TIBHAR 6000 W table is a very robust weatherproof table conceived for the outdoor stationary installation. This table is optically a real eye-catcher and the perfect alternative to concrete tables. The extra-thick 10 mm melamine resin tabletop coupled to a massive undercarriage and a robust permanent galvanized and powder-coated steel net confer optimal playing characteristics and durability. The TIBHAR 6000 W is perfectly adapted for the use in school and other playing playgrounds, as well as in all other official places, where table tennis sports will enrich the already existing sports program range.

Use: outdoor
Colour: grey

- 10 mm melamine resin surfaces

1700 W

1700 W

The topic „security“ is also a major factor for outdoor tables. For this mid-range model, the emphasis was set on security. Therefore the trolley of the table TIBHAR 1700 W is wider in order to provide more stability. The tabletops made from melamine resin are long lasting and thus ideal for the outdoor use. The playback position allows solo training. This table is the ideal compromise for all players privileging outdoor table tennis. Supplied with integral net.

- 4 mm melamine resin table surfaces
- Colour grey

CLASSIFICATION

Type of floor covering Heterogeneous indoor floor covering

TECHNICAL CHARACTERISTICS

Total thickness 3.25 mm
Total weight 3250 g/m²
Width 2 m
Length variable / upon request
Surface treatment Tektanium™

REQUIREMENTS FOR SAFE USE

Friction 80–110
Shock absorption ≥ 4%
Vertical deformation ≤ 0.8 mm
Specular gloss ≤ 6 %

TECHNICAL PERFORMANCES

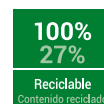

Vertical ball behaviour Compliant
Reaction to fire Cfl-s1
Resistance to wear ≤ 1 g
Residual indentation ≤ 0.18 mm (Average measured value)
Dimensional stability ≤ 0.10 %
In room noise < 65 dB (Class A)
Impact sound reduction 18 dB
Thermal resistance Approx. 0.05 m² K/W
(Compatible with underfloor heating)

TIBHAR GRIP EUROPE M is a heterogeneous indoor floor covering of 3.25 mm thickness especially designed for table tennis playing areas.

Its multi-layer construction with good damping characteristics and grippy surface is perfectly adapted to sports activities with fast movements. The surface texture with Tektanium™ finish treatment guarantees excellent playing quality, optimal durability, and reduced maintenance costs.

TIBHAR GRIP EUROPE M can be installed either permanently or temporarily. The high-quality floor covering manufactured by TARKETT has an excellent dimensional stability and can be reused several times.

TIBHAR GRIP EUROPE M is ITTF approved and matches or exceeds ISO 14041 for vinyl floors.

COLOURS:

Red

NEW

BLIZZARD SPEED II

The BLIZZARD SPEED II is the further development of the very successful BLIZZARD SPEED featuring most of its proven characteristics: The split sole construction with its stabilized centre, the ENERGY CONVERTER concept in the heel area developed by TIBHAR which absorbs vibrations caused by fast movements and converts them into additional energy during acceleration. The two-component phylon material confers high flexibility in the front and rear parts of the shoes. The proven MAXX TURN PROTECT speed-up system and the reinforced heel area protect the joints.

The combination 'NovO2MAX fabric / SOFT SKIN microfibre' inside confers optimal breathing activity and increased wearing comfort. The upgrade of the BLIZZARD SPEED impresses with large X-shaped PU protectors on the inside and outside. These protectors made from brand new ScaleTex material provide optimal freedom of movement and high wearing comfort; these shoes are a real eye-catcher in TIBHAR's assortment.

Colours: **black/red, red/black**

Composition: **PU, TPU**

Sizes: **36 – 46**

SUPERSONIC PRO LIGHT

The elaborately produced TIBHAR SUPERSONIC PRO LIGHT outshines all others with its classic, bright white design. Five STRONG-TPU-FILM protectors in STAR design offer the player safety and support so that the joints are relieved. The TIBHAR SUPERSONIC PRO LIGHT is equipped with NovO2max nylon fabric on the outside and SOFT-SKIN microfibre material on the inside, which with its sophisticated honeycomb structure allows optimum air circulation in the shoe, making it extremely comfortable to wear.

The use of the two-component Phylon material in combination with the division of the sole into two zones provide additional flexibility and stability of the centre of the sole and has a gentle effect on the joints. The proven ENERGY CONVERTER in the heel area of the sole absorbs vibrations caused by fast movements and converts them into additional energy during acceleration.

Colour: **white**

Composition: **PU, Mesh, TPU film**

Sizes: **36 – 46**

**NEW**

PRESTO

- Breathing nylon - microfibre fabric
- High quality workmanship
- Two-component stable sole
- Allows fast movements and direction changes
- Modern design featuring fresh colours

Colours: green, white

Composition: TPU mesh

Sizes: 36-46

MESH FLEXLIGHT II

The shoes TIBHAR MESH FLEXLIGHT II have the same base than the classic MESH FLEXLIGHT with even further improved technologies. These lightweight shoes are extremely comfortable to wear through optimum air circulation and breathability guaranteed by the use of the innovative structured SOFT SKIN microfibre materials. The upper material of the MESH FLEXLIGHT II is a particularly breathable nylon microfibre fabric, which adapts perfectly to the foot and stabilises it even during fast movements. The technology ENERGY CONVERTER in the rear part of the sole absorbs vibrations caused by fast movements and converts them into additional energy during rebound. The use of the proven two-component phylon material and the division of the shoe sole into two different zones ensure high flexibility and stability in the foot.

Colour: white/black/red

Composition: PU, Mesh, film TPU

Sizes: 36 - 46
